

OUR HISTORY IN PICTURES 211

LAST THIS TIME THERE WAS MUCH AGITATION AGAINST SLAVERY, AND THE ADMITTANCE OF THE THREE NEW STATES DIVIDED THE COUNTRY EQUALLY INTO EIGHT "SLAVE" AND EIGHT "FREE" STATES.

A complete set of these daily history strips makes a unique pictorial history of America. Hundreds are clipping them daily and pasting them in scrapbooks.

DOLL PIONEER FOR RED CROSS

Museum Exhibit Has Long Service Record

Career Began During Days of Civil War

Models Show Mercy Work of Organization

BY FREDERIC J. HASKIN (EXCLUSIVE DISPATCH) WASHINGTON, Sept. 20.—Miss Rose Percy has donned her winter costume of blue velvet. Miss Rose was born some time around the early '60's—before the rush and bustle of modern civilization.

Miss Rose Percy is a famous doll, which was dressed in 1862 by the pupils of a fashionable school for girls in New York. Her wardrobe is probably the most complete of any doll in history. Not only that, but the materials came from famous merchants of that day, and her jewels, stationery and calling cards, were from Tiffany. This is a bold and ornate creation in a satin-lined box bearing the name of the famous jeweler, and a miniature set of gold earrings and bracelets to match. The fan, dressing-case, completely fitted, reticules, in fact, everything requisite to the lady of fashion of her day.

CIVIL WAR DOLL

Like most of the ladies of that period she did her bit during the Civil War, in the days of the Sanitary Commission. But in New York City, where, after being on display and thrilling the souls of many small girls, she was disposed of. A picnicker bought her for the astounding price of \$1200 and she became the adopted child of his young daughter.

After all these years Miss Percy has found a new home in the museum of the American Red Cross, having been loaned by her present owner. After all she might be considered a pioneer worker for the Red Cross, since the Sanitary Commission was the forerunner of the present-day society.

While this doll is one of the most romantic of the exhibits of the museum, she has not been the only one in it. This museum was opened in 1919 and very naturally stresses the work of the Red Cross. Here are exhibited relics of the war work of the society and the results of its peace-time work.

The society is most proud of the many miniature models which show just how its work is conducted.

EMERGENCY STATION

The training of the emergency hospital in Tokio has sent to the headquarters of the American Red Cross about six months ago. It was made by a Japanese artist and is complete to the last detail. It shows a ship accompanied by so that there could be no possible mistake in putting it together. It is fascinating in its completeness. The medicine cabinet is in glass and the bed and other parts contain bottles which are so small that it was necessary to put them in place with forceps, the human fingers being too clumsy. The artist has placed the ship's bell of hundred strokes on her bearers who are showing carrying victims to the emergency hospital.

There are many models of this type, all made by the best artists and are to be seen in the same attention has been paid to the minute detail. In one showing wounded soldiers direct from the front awaiting their turn at the hospital, and having their injuries diagnosed, the wounds are most realistically shown by means of red paint indicating blood. A German prisoner is assisting in carrying the wounded.

Besides these models there are many relics which actually saw service during the war.

A trip through this museum is a reminder of the work of the Red Cross and of the appreciation and gratitude of our foreign neighbors whose appeals for aid have been promptly and efficiently answered.

International Conference
Late in October

Mott Urges Closer Union in
Fight On Crime

Strengthening of Ties With
Canada Sought

INT'L. A. F. MEMBER WIRE

NEW YORK, Sept. 20.—Evidence of the opportunity and power of youth to unite in combating "alarming tendencies affecting the lives of young men and boys on every hand" will be given when representatives of the Young Men's Christian Associations of the United States and Canada meet in Washington, D. C., next week of October. The national convention, which represents the common meeting ground of the associations from both sides of the border, will continue from October 21 to 23, next, and will be followed, October 27-28, by the annual meeting of the national council of the Young Men's Christian Associations of the United States and Canada.

Young men and employed boys from many of the thirty councils in which the associations of the United States and Canada are at work will be present at Washington.

MUST WORK CLOSER

To meet the problems of the day, young men must work closer, co-operation than ever before. Dr. John D. Rockefeller, president of the national and international committees on youth, speaking particularly of the problems in the United States and Canada, has said:

"When have the forces of order and lawlessness, of bitterness and strife in social, racial and international relations, of materialism and naturalistic philosophy, together with the pure, spiritual, religious and moral love of luxury, extravagance, ease-and softness, and from a general spirit of compromise with down-grade tendencies more basic and fundamental to life and our worth? We must present an impressive, visible

to meet such a situation."

Dr. Mott also makes an appeal for the strengthening of the ties between the English-speaking Christian nations of North America and the State to concerted action in the interest of the right in the interest of the two countries on the north-Great Britain.

An important issue at Washington will be the long-standing question of the proposed American membership in the I.M.O. Whether membership in an ecclesiastical church should be required is an important point involved.

Finances will be in the foreground during most of the national convention's meeting. Budgets for 1926, covering the work at home and abroad of the national council and State and local agencies, totalled \$1,644,925, of which \$2,400,512 had to be raised in contribution. The total divided into two parts, \$1,116,000 for work in the United States and \$2,224,019 for service to foreign countries. This does not include the sum paid each year by local associations for use in their home communities.

MURDER SUSPECT HIDDEN

17 Quarts of Ink
flowed from this old Parker

During 20 years in Uncle Sam's service

Yet harder still, than his hardy ancestors,
is the Parker Duofold of today

IT'S STILL a real, serviceable Geo. S. Parker Fountain Pen," writes Don L. Dyer from Sherman, Tex., and proves it by sending us the old pen itself.

It's the first fountain this Parker has had since it went to work for Mr. Dyer in the U. S. Post Service 20 years ago. A little sum of 25,000 handwritten letters, 40,000 money order receipts, and 10,000 registered letter receipts are to its credit. And when it was looking for more work in the meantime, its owner lent it to appreciative friends. Naturally it worked up quite a thirst in its labor—17 quarts of ink by the count.

There are a host of these Parker patriarchs still on the job after 20 and 30 years, and longer. They are the forefathers of a hardy race of men—men with quiet eloquence of Geo. S. Parker's skill and energy and success in making his products the worthy custodians of his business honor.

And Mr. Parker's Duofold Pen of today is the highest achievement of the whole painstaking career:

Hand-dip Ink Capacity, Invisible Filler, Free-Bringing Balance, 25-ye Point; and the Black-tipped, Lacquered Metal, no handles to carry and hard to mislay.

Pen counters wouldn't be without it. It is ready there for you.

COLORADO RIVER A MENACE OR AN ASSET?

Taming the Giant of the Southwest

THE primary motive behind the Boulder Dam project is the removing of a flood menace which each flood season threatens to devastate the land through which the Colorado River passes. Plans for Boulder Canyon Dam originated in Congress in answer to an appeal from frantic people to save their land property and lives from destruction.

In 1922, 45,000 acres of highly developed land in Pekos Verdes Valley were entirely submerged for 90 days. An even greater danger confronts rich, fertile Imperial Valley. Lying below sea level, this district once inundated, will remain an inland lake until the sun, by evaporation of centuries, uncovers the land. 60,000 people, \$100,000,000 worth of property and an annual crop value of over \$60,000,000, will be permanently protected by Boulder Dam.

Los Angeles too will profit greatly by this Federal project. Terrific growth and expansion has outdistanced our power and water resources. An adequate supply of water and cheap, dependable power has been, and always will be, the determining factor in our prosperity. Boulder Canyon Dam, if built to full height proposed, will forever meet Los Angeles' water and power needs.

Boulder Canyon water and power is logical. It is more easily accessible than our present sources. It is the only remaining source for a future supply. Los Angeles' share of Boulder Canyon Dam power will not cost tax-payers one penny. Revenues will defray all charges as well as protect the present low rates for municipal power now offered by the Bureau of Power and Light.

years of age, and Dennis

Richardson, 25, both of 329

Broadway, Cambridge, were

sitting on the banister rail

at their home when Catherine

lost her balance and

Dennis in trying to save her, lost his. Both fell to the

floor below. They were sent

to the Cambridge City Hos-

pital, where they were found

to be suffering from minor

injuries and were sent home.

This started a romance,

and now they are planning

to be married. The marriage

intentions already are filed.

[EXCLUSIVE DISPATCH]

PHILADELPHIA, Sept. 20.—Con-

clusion is that future trad-

ing in the grain market is

not to be expected.

The commission says that

one of the most important and significant

facts statistically demon-

strated is the downward bias of the

future market.

[DEFINITE TENDENCY]

An extensive comparison of price

data for various grains and op-

tions over a year shows that,

on the average, there is a definite

tendency for the future price in

the earlier months of trading (per-

haps, nine months ahead of de-

livery) to fall short of the price

paid in the cash market or in

the month of delivery.

In other words, the tendency of

the future price is to understate

the cash price, in a majority but by

no means in all of the instances

dealt with. This bias of the fu-

ture market in the direction of

lower prices is reflected in the

weight of selling hedges dur-

ing the heavy marketing season.

The fastest-selling high-powered car in the World

Why the One-Profit Big Six Studebaker outsells all others

NO other car of equal or greater power (according to the rating of the National Automobile Chamber of Commerce) approaches the Studebaker Big Six in popularity.

The Big Six leads in sales not only in the United States, but also abroad.

It leads because one-profit production in vast modern plants enables Studebaker to offer a sturdy built quality car with scores of thousands of miles of excess transportation at prices far below those of competitors.

There are only seven American cars with rated horsepower equal to that of the Big Six and their prices are two to four times that of this famous car.

It's not surprising that the Studebaker Big Six is the fastest-selling high-powered car in the world.

A Better Car at a Lower Price

Tremendous mileage records achieved under grueling conditions by numerous Big Sixes testify to the rugged durability of this chassis.

For instance, out in Arizona Studebaker outsells its normal proportion of cars. Here one person out of four who buys a car selling for over \$1000 selects a Studebaker in preference to 57 other competing makes.

Every county in Arizona which has bought an automobile for its sheriff has selected a Studebaker.

In Oklahoma, too, Studebaker is the favorite car of the hard-driving men of the oil fields. They have found by experience that at a mileage when other cars are breaking up Studebaker are breaking in.

Studebakers stand up because they are not "assembled" but *manufactured* as a unit in Studebaker plants. Being built as a unit they function as a unit and yield scores of thousands of miles of excess transportation.

To the powerful engine and sturdy chassis Studebaker adds a body so staunchly built, so finely finished, that no car at any price excels it. These superiorities are possible at the price for two reasons:

1. Studebaker is the only manufacturer in the car field equipped to make all its own bodies, engines, gear sets, springs, clutches, differentials, steering gears, axles, gray-iron castings and drop forgings. Thus, Studebaker eliminates from the price you pay, the extra profits and overhead of outside parts and body makers.

2. Unlike the other high-powered cars listed, the Studebaker Big Six benefits from the great economies incident to volume production. It is manufactured in company with two other chassis models in the finest plants owned by any individual manufacturer except Ford.

Increased volume of sales—founded on Studebaker's policies of One-Profit manufacture and no yearly models—made it possible to reduce the prices of the Big Six Studebakers on August 1st.

Figueroa at Pico Street
6116 Hollywood Blvd.

Today you can buy the same Studebaker Big Six that has won fame the world over for its power, comfort and excess mileage, at a lower price than ever before.

The only American cars which exceed the Big Six in rated horsepower compare with it in price as follows:

Studebaker Big Six

N. A. C. C. and S. A. E. rating—36.04
Price of 7-Passenger Sedan f. o. b. factory \$2245.

Car A—1% more power \$2755 higher price
Car B—1% more power \$2855 higher price
Car C—7% more power \$4755 higher price
Car D—25% more power \$5855 higher price
Car E—31% more power \$7430 higher price
Car F—35% more power \$4565 higher price
Car G—35% more power \$7255 higher price

Not one of these manufacturers enjoys Studebaker's advantages of volume production. In spite of moderate prices to the purchaser, Studebaker engineering, construction and workmanship is unexcelled—even by the most expensive cars.

No Yearly Models

The Studebaker policy of "no yearly models" is a further protection to owners. Under this policy Studebaker cars are always up to date—we add improvements from time to time. We do not save them up for spectacular annual announcements which make cars artificially obsolete.

Any of the dealers listed below will gladly show you the Big Six Sedan and finance its purchase on Studebaker's fair and liberal Budget Payment Plan, if desired.

COTTON MARKET GAINS STRENGTH

Bullish Government Crop Report Expected

Continued Drought Causes Drop in Estimate

Profit Taking Heavy, Due to High Prices

[EXCLUSIVE DISPATCH]

NEW YORK, Sept. 20.—The cotton market was strong during the greater part of the week with prices showing an advancing tendency under the impetus of the continuation of the recent broad profit demand and speculative trade buying of cotton for future deliveries not only here but at Liverpool and New Orleans.

This was influenced by the tendency to anticipate another unfavorable or bullish government crop report. It is due to be announced next Wednesday and will cover the average condition of the crop as of the 16th instant and give the indicated yield of that date, keeping the production of semimonthly crop reports from July 1. This program will be continued until the end of October.

The sentiment of the trade is not crystallizing around a positive or adverse condition as reported yesterday, but the market will cover the average condition to August 25 and will be important factor in settling the market for the reaction late Thursday from the top and the further setback of Friday afternoon. In this reaction the market went on to 15 cents a pound, March 24.13 and May 10.24 cents or about 60 points decline from the highest price reached. At the close Friday, October, finished at 12.53, March 24.53, January 13.53, March 20.00 last year.

SEED PICKING

The crop is being picked and ginned with the greatest rapidity for this time of the year on record. It is also being marketed in the commercial market. This is shown by 574,000 bales of the crop coming into sight this week in the plantation movement against 482,000 bales in 1924.1

It makes the total amount of the crop brought into sight from August 1 to date 2,056,000 bales against 1,492,000 the same period last year. The same takings of American cotton from August 1 to date are 1,250,000 bales against 1,020,000 the same period last year. This includes 755,000 bales of exports against 698,000 last year.

Visible supply figures are increasing rapidly from the way the crop is being marketed.

The increase in the world's visible supply of American cotton for this week is 327,000 bales against

12,740,000 in the last report which covered the average condition to

August 31 and 18,890,000 bales in

the previous report.

The total cotton produced last year was 13,627,000 bales of the

gross weight of 500 pounds each.

CHANGED CROP OUTLOOK

Two months ago the trade had been figuring on this season producing a large a crop at 14,500,000 to 15,000,000 bales from the 46,500,000 planted. The shrinkage from that time in the prospective yield has been due to the abnormally long drought in Central and Southern cotton areas. July and August followed on the heels of the heavy deterioration of years in other parts of the belt during August from very hot and dry weather.

BONDS RETURNED BY HONEST MAN

Farmer Gets Securities He Put Into Wrong Auto Through Error

[BY A. P. NIGHT WIRE]

WILBER (Neb.) Sept. 20. R. F. Prince, wealthy farmer of Wilber, was richer in bonds and in faith in the honesty of his neighbors today. Last Tuesday Prince inadvertently placed a strong box containing \$14,000 in bonds, under a rear seat in an automobile which he thought his own. Coming back later, he discovered his error. Unperturbed, however, he advertised his loss and expressed the opinion that "I will get them back as everybody around here is honest." Yesterday Joe Swaro found the box and bonds under the rear seat of his car. He returned them immediately.

SIXTY STUDENTS OF AVIATION WIN WINGS

[EXCLUSIVE DISPATCH]

SAN ANTONIO, Sept. 20.—Sixty students of aviation recently completed their quest for the silver wings of the Air Service. Following an aerial review at Kelly Field the sixty, making up the graduating class, assembled at the aviation club and after short graduation exercises were given their diplomas from the air service advanced flying school and awarded their wings.

The class was composed of forty-two student officers, seventeen cadets and nine noncommissioned men. The cadets and noncommissioned officers were given commissions of second lieutenant in the Organized Reserve Corps.

Visible supply figures are increasing rapidly from the way the crop is being marketed.

The increase in the world's visible supply of American cotton for this week is 327,000 bales against

12,740,000 in the last report which covered the average condition to

August 31 and 18,890,000 bales in

the previous report.

The total cotton produced last year was 13,627,000 bales of the

gross weight of 500 pounds each.

MYSTERY GIRL'S BODY DISOWNED

Family of Former Heiress Refuse Burial

Senator's Daughter Figure In Night Life

Friends Taking Up Collection for Funeral

[EXCLUSIVE DISPATCH]

CHICAGO, Sept. 20.—The body of Ruth Silver Dollar Echo Tabor, daughter of the late Senator H. A. W. Tabor of Colorado, and one-time heiress to millions of dollars, lies today in a local undertaking establishment unclaimed.

Appalled friends and relatives of the girl, who was found dead Friday night under mysterious circumstances in her apartment, have failed, and a collection is being taken up by her friends in the neighborhood to give the girl a decent burial.

Police today started an intensive search for a man known only as Bill, who lived in the apartment with Mrs. Tabor August 15, when she disappeared about ten days ago.

Friday night the girl was found, scarcely clad, unconscious, on the floor of the kitchen, by Harold Tift, janitor of the building, who had broken in the apartment when he heard the young woman screaming for help. Her body was severely burned from an overturned kettle on the stove.

NOTE ON PHOTOGRAPH

"Turn off the gas and close the door," she muttered. Tift told the police.

Tift then called John Monheim, a tenant in the building, and they carried the girl into the front room, where she died.

Police said that she was obliged to enter the apartment through the fire escape, as both the front and back doors were locked. When he asked her what was the matter, she told him she had scalded herself and asked him to call the doctor.

Jack Reid, a former saloon keeper, who is being held by the police after his photograph was found in the apartment, insisted that he had not seen her for nearly a year.

On the back was scribbled a

note directing the police to arrest Reid and hold him responsible in case of death. It read:

"If I am hurt or killed, this man will be directly or indirectly responsible."

Neither Tift nor Monheim could identify Reid as a caller.

FATHER SPENT FORTUNE

Although the police are anxious to question the man known as "Bill," they conclude that the girl came to her death accidentally.

Ruth Tabor died estranged from her friends and family. She came to Chicago about eight years ago and took up residence on the South Side. She was widely known but spoke little of her past, other than to say her father was once wealthy.

Her father, known as "Lucky" Tabor, accumulated and dissipated a fortune estimated at \$10,000,000.

During the height of his career he was a noted sportsman and breeder. He was appointed a United States Senator to fill an unexpired term. He was divorced from his first wife and settled \$1,200,000 on her.

His second wife, following his death, took up an abode in poverty at one of Tabor's mines which was run out and attempted to recover part of the lost fortune. The two daughters lived with her.

SISTER DISOWNS HER

An effort to help came today from Mrs. Mary Day, who kept a restaurant in Denver ten years ago and knew Mrs. Tabor and her two daughters in their poverty. She offered shelter to Mrs. Tabor, the girl's mother, in the event she

GRID FANS, FOLLOW THE BALL WITH ZUPPKE IN "THE TIMES"

Beginning today and daily thereafter, exclusively in the sport section of The Times the how and why of football by Zuppke, the leading strategist of the game. Under the title, "Follow the Ball," Robert C. Zuppke, head football coach of the University of Illinois, has written a series of forceful and unusual articles on the great American game. Zuppke is artist and philosopher, as well as supreme football strategist. He pictures football as an art and a philosophy. Food for thought, stirring, stimulating, energizing, is in his every sentence. With each of Zuppke's articles, he gives a diagram showing one of the elementary and fundamental plays of football. Collectively, these remarkable diagrams will furnish a guide to all the strategy which is needed by any good school or college team to play finished football. First installment appears today on next page, this section. Don't miss a single article.

TO TEST VALIDITY IN COURT

Judge to Pass on Signatures
on Recall Petitions Filed
in Imperial County

By Local Correspondent
EL CENTRO, Sept. 20.—Preliminary hearing for the elaboration of the recall petitions to be furnished the Board of Supervisors is to be held before Judge Ira F. Thompson of Los Angeles presiding in the Superior Court on Sept. 25.

The suit alleges that many of the 2025 names on the petitions were obtained by fraud and misrepresentation. Also, that the petitioners did not sign in accordance with legal requirements.

A temporary restraining order stopping the recall proceedings was signed by Judge Walton J. Wood of Los Angeles on Sept. 11, and today's hearing is to determine whether or not the order shall be made permanent.

Members of the American Conserva-

tion League are ap-

pealing the ruling.

The suit also claims that the

OIL AND MINING

MIDWAY VOTED GAS FRANCHISE

Pipe Line Privilege Given by Ventura

Extension to Link Glendale With Field

Supply Destined for Use in Los Angeles

The city of Ventura has granted the Midway Gas Company a franchise for a gas pipe line extending through Ventura on its way from the Ventura-avenue field to Glendale, where it will connect with the Los Angeles distributing system.

The Shell Company has completed its six-inch oil pipe line from the Ventura-avenue field to tide-water. This line will connect the two four-inch pipe lines, and the two lines will give the company a carrying capacity of 35,000 barrels off a day between the field and the docks.

The Associated Oil Company has dug to a depth of 500 feet in its Lloyd No. 161, which is located a mile and one-half east of present production in the field.

Bolsa Chica Oil Company has the Derrick up for its Hartman No. 1 well on the north dip of the field.

The Shell Company has made location for its Taylor No. 11 on the south dip of the river. This well will be 500 feet west of the location for its No. 10 well, which, in turn, is 500 feet west of the No. 9, recently placed on production. The well for the No. 10 is almost finished and the site for No. 11 is being graded. If the No. 11 should make a well it would extend production 1000 feet west of its present limits.

Half-Year Oil Production in Kern Reported

EXCLUSIVE DISPATCH
BAKERSFIELD, Sept. 20.—Kern county oil fields produced 30,812,227 barrels of oil during the first six months of the year. The total production for 1924 was 61,171,147 barrels. Production figures over a period of twenty-five years up to July 1, this year, show that Kern county has produced 975,237 barrels during that time.

The production by fields for the first half of the year was as follows:

Midway-Sunset fields, 18,724,792 barrels; Elk Hills, 6,772,278 barrels; Kern River, 3,199,565 barrels; McKittrick, 1,042,323 barrels; Lost Hills, 6,671,223 barrels; Wheeler Ridge, 171,500 barrels.

In the figures for twenty-five years, Kern county production shows the following output for the year:

Midway-Sunset, 530,709,843 barrels; Kern River, 252,408,556 barrels; McKittrick, 70,386,131 barrels; Elk Hills, 66,069,643 barrels; Lost Hills, 52,888,707 barrels; Wheeler Ridge, 710,857 barrels.

KERN RIVER WELLS SHUT IN

Associated Closes Down Hundreds of Pumpers to Help Take Storage Burden Off Several Companies

BY HOWARD C. KEGLEY

Shutting down approximately 450 of its pumping wells in the Kern River oil fields, the Associated Oil Company, on Saturday, closed in upward of 4000 barrels daily production as its share in the pinch-down program which California oil operators have been executing in an effort to avoid glutting the market with crude.

Action by the Associated followed similar shutdowns by the Shell Company, the Standard Oil Company and the Pacific Oil Company. Virtually all the companies have occurred in the Kern Joaquin Valley fields, and largely to Coalings, Maricopa and Bakersfield. It is roughly estimated that between 25,000 and 30,000 barrels of crude-oil production are now being taken in, among the various valley fields.

The most accurate reports available are to the effect that the Standard has shut in 6500 barrels a day, Shell 5000 barrels, Pacific 4000 barrels, and Associated 4000 barrels. It is probable that the shut-in production, of which the Union Oil Company is reported to have some, amounts to nearly 20,000 barrels a day in California's oil fields.

The major operators have built millions of barrels of new storage in recent months to take care of the continually increasing output of crude, and still are still continuing tank repair programs at different points to store the flush production. Unfavorable price conditions on the Atlantic Coast, because of recent ship reductions in Midcontinent crude prices, made it appear uneconomical for California operators to ship their crude east, so they are shutting in what they can and storing what is left over in Pacific Coast tanks, and overhauling eastern contracts are taken care of.

Operators said Saturday that they consider it unlikely that California will be compelled to cut the price of crude oil in the near future.

SOON TO TEST OBISPO ZONE

Secret of Recent Gusher May Be Revealed This Week; Trojan Test Wet; Milham Going Deep

EXCLUSIVE DISPATCH

MARICOPA, Sept. 20.—Something definite concerning the future possibilities of the Obispo area of the Maricopa field is likely to be known within the next ten days. It may transpire that the district is capable of big gushers, and it may develop that the territory is spotted. It may also be learned that the big production, which recently came from the Obispo No. 6, emanates from genuine oil sand instead of from the brown shale for which the region is noted.

The Obispo No. 6, which sanded up three weeks ago after flowing at the rate of about 10,000 barrels per day, is being drilled to bottom at 4003 feet. The cement was drilled at 2600 feet. Thursday, the crew is now going ahead in the expectation that it will be possible to put the well on production in a normal manner, so that a fair test of its ability may be made.

The hole is reported to be in excellent condition.

The Trojan Oil Company, which drilled an offset to the Obispo well on the east, on twenty acres, is sidetracking down to 6224 feet. According to reports from the field, if the organization fails to pick up oil sand within a reasonable distance after finishing the sidetracking job it will plug back and make a test at a shallower level.

It is asserted that the drillers has indications of considerable reserves in the vicinity of 5000 feet, and that it is thought that oil can be obtained in that zone to make it possible for the company to convert its government leases in that area into permits.

The test is said to have demonstrated the presence of vanadium in the oil treated; one sample showing a vanadium content of 1.1 per cent, valued at \$80 per ton of ore at present quotations. Another sample, according to the test, carried 1.4 cent in vanadium, the one having a value of \$80 per ton.

The process is the invention of Prof. Alexander Elliott of this city, chemist and metallurgist, who expects shortly to direct the company to convert its government leases in that area into permits.

The El Dorado Oil Company's No. 8 well, cornering with the Obispo, is being drilled to bottom at 2300 feet, being deeper than any of the four other deep tests excepting the Trojan's.

The Milham Exploration Company's Sun No. 1, within one-half mile of the city of Maricopa, is drilling below 2250 feet, expecting to go down 4000 feet or deeper. The well is on the opposite side of the Obispo, in the same oil field, in the Obispo district, in which several heavy producers are situated. Some unusual formations have been found in its cores, the first 700 feet being separated from the lower brown shale by a gray shale, resembling the Santa Maria shale. Below this are streaks of genuine brown, which have encouraged the company to go on down in search of gusher production.

The General Petroleum Corporation has just completed, on a lease which it obtained last year from the Maricopa Company, its No. 379 well, located on Section 35, 12-24. It is reported to be putting out 150 barrels of crude per day, the gravity test being about 15.

This well was completed with eight and one-quarter-inch casing set at 2100 feet. It is reported that 1400 feet of the formation consist of sand.

This is the last well of the present program, and unless fast wells are required to meet the action of other companies, no other wells are in immediate prospect, according to Sup. W. C. Fiebier, who has charge of the property.

Franchise Held Key to Immense Gas Storehouse

EXCLUSIVE DISPATCH

OKLAHOMA CITY (Okla.), Sept. 20.—The securing by the Upana Gas Company of Mineral Wells, Tex., of a natural gas franchise in Childress, Tex., is asserted to be the first step in the unlook one of the large storehouses of gas in the Panhandle—that of Wheeler county, which is said to have a 2000-foot well with a daily capacity of over 200,000,000 cubic feet.

Other franchises are being sought by the company at Wellington and Memphis. The three towns are the general centers of distribution, and from them the company plans to lay a pipe line southeast to a connection with a trunk line of the Lone Star Gas Company that will deliver gas to Fort Worth and Dallas.

Comparison of California's Daily Oil Production

Average for Week

District—	Week ending Sept. 12	No. of Wells	Week ending Sept. 19	No. of Wells	Week ending Sept. 20	No. of Wells

LOCAL MEN BUY ARROW MINE GROUP

Development of Nevada Property to Be Pushed Vigorously

EXCLUSIVE DISPATCH

TONOPAH (Nev.) Sept. 20.—The Gilbert Arrow Mining Company, the Arrow group at South Gilbert, has been purchased by A. J. Beecher and George W. Myers of Los Angeles, and arrangements have been made for vigorous development of the property. The new owners state that a development fund of \$25,000 will be provided, equipment installed, and mining actively conducted.

The shut-down of Associated oil wells in California were all produced normally at present the daily output of crude would easily be in excess of 700,000 barrels per day.

The shut-down of Associated oil wells at Kern River were taken after sunset Saturday night at 6 o'clock following the receipt of orders from the company's head office at San Francisco.

Early Sunday effort is being made by Sup. L. P. Fout of the Associated to protect oil workers who were affected by the shut-down, and it is believed that it will not be necessary to lay off oil employees as a result of the change.

"I believe that there is plenty of work to be done in construction and repairing equipment on our leases to keep even men on the payroll," says Mr. Fout.

The action of Associated interests has resulted in the decreasing of the oil field production in the county, including output of crude, and still are still continuing tank repair programs at different points to store the flush production. Unfavorable price conditions on the Atlantic Coast, because of recent ship reductions in Midcontinent crude prices, made it appear uneconomical for California operators to ship their crude east, so they are shutting in what they can and storing what is left over in Pacific Coast tanks, and overhauling eastern contracts are taken care of.

Operators said Saturday that they consider it unlikely that California will be compelled to cut the price of crude oil in the near future.

DOHENY OWNS NEW FIELD

TEMESCAL RANCH OF 10,000 Acres in Ventura County Now Regarded as Proven Field

BY ROBERT J. PRITCHARD

E. L. Doheny has found another oil field. And he owns it all himself, although this is nothing new in the life of Mr. Doheny. The point is that the discovery merely means the addition of a few millions, or perhaps a few hundred million barrels to the known reserve of petroleum in California, and for the present at least will not have the slightest effect on the supply or the price of oil.

The new field is located on Doheny's Temescal ranch, near Piru, in Ventura county. The property comprising 10,000 acres is owned in fee by Mr. Doheny, and is being operated by the Temescal Petroleum Company, a Doheny corporation formed especially to develop the Temescal ranch.

Temescal No. 2 well, which puts the field in the proven class, is not yet completed, but is flowing about forty barrels a day between the two oil wells in the Temescal area. The new field is about fifteen barrels a day. Whether it will be deepened or not depends upon the final outcome of No. 2, it was officially stated.

DECISION PENDS

Temescal No. 1 made its production after penetrating the oil sand only about one foot, and as a consequence has been limited until now to about 100 barrels a day. The oil is in 21 deg. gravity, and carries a high percentage of gasoline. The well is drilling in oil sand, and the blow-off is at 1000 feet.

The new field is the only one in the Temescal area to be producing, and the oil is of a high grade.

The new field is the only one in the Temescal area to be producing, and the oil is of a high grade.

The new field is the only one in the Temescal area to be producing, and the oil is of a high grade.

LOS ANGELES (Loco Ahng-hay-lais)

MEMBER OF THE ASSOCIATED PRESS
The Associated Press is exclusively entitled to
the use for reproduction of all news credited to it
or not otherwise published here.The Times aims at all times to be accurate in
every published statement of facts. Readers who
discover any important inaccuracy of statement
will find the fastest method of correction of the Editorial
Department to the error.TOO INVITING
Down in Alabama there is a newspaper
named the Evergreen Courier. Give one
guess as to what the punsters do to that.POOR KILLING
It used to be said that reading maketh
a fool man. But there is plenty of it on the
magazine stands now which merely maketh
a fool man.INDOOR SPORTS
Many a self-styled sportsman tries to
create the impression that he is a big-game
hunter when all he ever hunts for is blind
tigers.ONE TROUBLE
Europe is a great old place for security
pacts. But the trouble is that when
one security pact conflicts with or menaces
another security pact the result is great
insecurity.BE CARELESS CAREFULLY
If you must accidentally shoot a person
instead of a deer while out hunting, for
heaven's sake pick out some one who is
careless with matches or cigarette butts in
the woods.CALM BUT UNCOLLECTED
Any man who gets excited and loses
his head in a traffic jam is likely to soon
be quite calm, but his fragments may never
be collected.IN THE GUTTER
The officials are going to pour 7000 gallons
more of wine and alcohol in the city
gutters in a few days. No wonder there
are wastrels who aver that this living in
the gutter is not half bad.THE WATER CURE
A judge decides that it is neither a
crime nor grounds for divorce when a hus-
band holds the wife's head under a fire hydrant.
After all, this may be the best treatment
for "red-hot mama."THE INK SLINGER
Waterman, the fountain-pen king, who
has been nominated for Mayor by the Re-
publicans of New York, will probably try
to get all the voters to sign on the dotted
line. For one thing, they may be slinging
ink instead of mud in this campaign.JUICE OF THE GRAPE
The Department of Agriculture issues a
pamphlet to tell how to make grape juice,
but what the Department of Justice wants
is a formula to prevent the stuff from fermenting.
The government may be starting off
a flock of home brewers without showing
them how to stop.MATTER OF FORM
An English scientist is urging men to
take example of the ladies and reform
their clothing. Is that what the girls call it?
The reform movement must be one
that reveals about all there is of the form.
If the men get that way they may be
pinched by the cops.BIG-TIME STUFF
Now we are informed that there are
eight or nine universes as massive and im-
posing as the one we call our own. Some
day we will be able to get a peek at them
through a great telescope and then we may
begin to realize how small and foolish we
are. If there are 1000 worlds as huge and
as populous as this, what difference does
our dinky little coal strike make? Why
should we grieve when the wife bobs her
head?THE IDLE WARNING
The Chief of Police may suggest that
our maidens should not take motor rides
with strangers, but the girls will keep on,
doing as they please. A lot of them are
ready to take any chance. They like to
play with fire and when something does
happen to them they have recourse to the
dream book for an explanation. As long
as there are men, motors and maidens there
will be a mixing. It has even become im-
possible to protect the girls against them-
selves.SIGNS AND SIGNALS
This idea of a pedestrian raising his
hand when he wishes to cross the street
is all well enough, but a trouble to the
same sign is used by the hundreds of young
and old who are daily beseeching rides
from flitting motorists. Because of liability
laws and various complications there are
lots of drivers who will not open their cars
to strangers under any circumstances. In
an era of hold-ups they can hardly be
blamed. There should be no confusion of
signs. If the raised palm is to indicate the
demand of the pedestrian for his right of
way at a crossing some other signal should
be invented for the guy who would sponge
a ride. Let him give the sign of distress
by placing both hands to his temples and
making a noise like a goat.TOO BREEDERS
Commenting on a recent book by Hector
Bywater, a London writer, entitled "The
Great Pacific War," the Japanese Times
says editorially:Our contemporary, the Tokio Nichi
Nichi, is inclined to believe that cer-
tain British publicists and politicians
will actually rejoice if the United
States and Japan should make
come to strife. We do not believe that
this is the considered opinion of the
best minds of Japan or Great Britain;
but we do think that a law prohibiting
people from writing nonsense that
might possibly cause other nations to
collide and providing for corporal pun-
ishment if the law be violated, should
be enacted. Sowers of racial and in-
ternational discord ought to be pun-
ished with the utmost rigor of the law.
For this are the ones who are responsible
for the unbridled loss of murder,
rapine and moral and material degra-
dation that follow wars, after the bubble
of "glory" has vanished.In the book in question a war is depicted
between Japan and the United States in
1931, which lasts for two years and ends
in a draw. It has attracted some attention
in Japan; but the comment is not favor-
able to the author, who is accused of seek-
ing to foment discord between the United
States and Japan. One publication saysJapan, in the book, is awarded the
role of aggressor and picks a quarrel
with the greatest, richest, most power-
ful and most advanced of nations
who are making their imprint on the
civilization of today. For example, why should this empire fight at all?
If she must, why pick on the rich
and powerful United States that has
friends all over the hem of the Pacific
Ocean? Why commit economic suicide
right from the start by quarreling with
Japan's best customer?These comments are illuminating. They
give a glimpse of the conservative spirit
of Japan and the enlightened views held
there of world affairs. There have been a
number of comments recently in the Jap-
anese press concerning the attempt of cer-
tain outside influences to create discord be-
tween the Japanese Empire and this country.
Some of the writers point out that Great Britain lost the economic supremacy
of the western world through the World
War; and they suggest that there may be
those in England who believe that it could
be regained if the United States were to
engage in an important and prolonged war,
preferably with Japan.But the Japanese are not inclined to be
drawn into a foreign war to benefit some
other nation, not even their late English
ruler. Their leading minds have no illusions
concerning what a war with this country
would mean. They freely admit that the
odds, both economic and in a military sense,
would be decidedly against them. They
are not blind to the superior advantage of
the greater wealth and population of this
country in such a struggle. They say that
it would be the height of folly for Japan
to pick a quarrel with America; that the
Pacific area is big enough and broad enough
for both and that they cannot afford to
fight for the gratification or economic ad-
vantage of Europe.According to Japanese expression, there
will be no conflict between the two nations,
unless this country should prove the
aggressor and force Japan to fight in self-
defense. The Japanese statesmen have no
more thought, according to their published
utterances, at least, of sending their navy to
attack the Pacific Coast of the United
States than of sending their airships on a
plundering expedition to the moon.While it is possible that there may be
those on the other side of the Atlantic who
would take pleasure in seeing the wealth
and manhood of this country and Japan
wasted in a war between the two nations,
who would like to see the prosperity of
both peoples brought to a bloody end, there
are no present prospects that their desire
will be gratified. And The Times is con-
vinced that these ill-wishers are in a
minority. Such a foreign policy might have
been adopted by some of the monarchies
of the seventeenth and eighteenth centur-
ies; but it is too Machiavellian for the
present generation, outside Bolshevik Russia.Neither this country nor Japan could
gain much through a military conflict; for
there could be no hope of reparations for
the victor covering a hundredth part of the
loss. At present they are mutually good
customers and good friends. As the Jap-
anese say, the Pacific area contains ample
space for both, and those who seek to
foment trouble between the two peoples are
public enemies. There is some merit in
the Japanese suggestion of penal punishment
for those who seek to incite peoples to
violence. Writers like Bywater may well
be compared to the morons who scatter
lighted matches and cigarette stubs among
the dry leaves of our national forests.THIS NOISY WORLD
This modern world of telephones, ra-
dio and automobiles, with its industrial,
commercial and political confusion, is too
noisy and nerve-racking for H. G. Wells.
He has gone to live and work in an isolated
farm house, somewhere in France. Mr.
Wells explains that he has a very important
piece of literary work to do and needs
"several months of absolute solitude" in
which to complete it. He has not, his
friends say, become a churlish misanthro-
pist, but simply has found that the hubbub
and uproar are too much for him and that,
in order to produce what presumably is to
be his masterpiece, he must be well out of
the world.All authors are not like Mr. Wells. Some
of them are able to do excellent work in
hearing of the discordant sounds of busy
streets. They say they get inspiration from
the city's roar and tumult. But by far the
greater number seek quiet. Isolated
nooks in which to wield the fountain pen
or pound the typewriter. If there any
noise to be made they want to make it
themselves, both at home and when their
books or articles go forth to an eagerly
waiting world. So they lie themselves
away to rural retreats, with the evident
idea that the perfect heat of creative work
requires a certain insulation and at the
same time a close contact with the great
storage battery called nature.Not only does the great writer find the
world too noisy, but he also finds it too
noisy, a word that has not yet crept into
our lexicon, but which may be defined as
curious, intrusive and meddlesome. He is
fettered out by unwelcome interviewers, book
autograph hunters and bill collectors. BookAIMAL FETS
The sagacious scientist says that it is
2000 years since man has domesticated a
new animal. There have been a raft of
animal trainers, but there are no more quad-
rupeds in the barnyard than there were in
the days of Caesar. Elephants were work-
ing for men and bears were in harness
4000 years ago. Nothing much has hap-
pened since in extending human compa-
nionship to the animal world.TOO BREEDERS

To-oo-ot!

SHAME THE DEVIL

BY ALMA WHITAKER

Life on this planet is going to become quite
"scruples."Somehow it is easier to trump up some reason
to the bar, accused of a vile crime, than to hear a
son called as a respectable witness, testify as
that she once knew the meaning of "fine scruples."Thus did a woman testify in a
recent court case. She said that
the accused had offered her \$500
to give false evidence."I talked it over with my hus-
band and he would not allow me
to take part in it," she is quoted as
saying naively.This seemingly mild remark
marks of an incredible state of af-
fairs.Here is a presumably normal,
worthy citizen tacitly admitting
that she was not horrified and in-
sulted when the suggestion was
made to her that she should lie
for money; that, on the contrary,
she comfortably considered the
pros and cons of the situation;that she and her husband "talked
it over," but finally decided against
it.Dear heaven, let us hope that
the husband at least had a sense
of humor somewhere—that his stand
was not taken wholly upon ex-
pediency.Personal purity, integrity, recti-
tude, honor must surely be the
first fundamental of decent char-
acter. Without them, what have
we? A world of potential crime,
a world, a world in which righteous-
ness is forever subject to expedien-
cy, truth forever subservient to de-
ceit."Tell the truth and shame the
devil" is an old Calvinistic maxim
that most of us subscribe to in our
hearts. Living, cheating, deceit,
hypocrisy, sham, chicanery are still
ostensibly abhorrent to us. Treach-
ery, dialogy, fraud are still hate-
ful words.But we have some prettier scruples
to replace them. "Graft,"
"bluff," "fake," "trickery," "trifles,"
"frame-up," "bluffing." If
that's just a common thief, a dirty
trader, a contemptible liar—oh,
no. He was a "grafter," a "big
bluff."

Of Interest to Women.

CHEF WYMAN'S Suggestions For

TOMORROW'S MENU

Breakfast
Casino Melon
Creamed Ham and Poached Eggs
Toast
Milk

Luncheon
Baked Noodles Napoli
Tomato and Pepper Salad
Orange Marmalade Pie
Milk

Dinner
Purée of Eggplant
Ripe Olives
Roast Sirloin of Beef
Cauliflower au Gratin
Lamb Chops
Shredded Cabbage
Pineapple Salad
Steamed Fig Pudding
Lemon Sauce
Milk

BAKED NOODLES
Beat four eggs slightly and add one-half teaspoonful of salt and two and two-thirds cupfuls of flour and knead smooth. Roll out very thin and dry for two hours. Roll up in a tight roll and cut out quarter-inch slices. Drop the noodles in boiling salted water and when done add a few more minutes and rinse in cold water. Place in a dish of one-quarter of the noodles in a buttered earthenware baking dish, cover with one cupful of seasoned chicken or ham or chicken, add a layer of noodles and cover with the noodles. Beat two eggs with one cupful of thin cream or milk, add a seasoning of salt and pepper and pour over the noodles. Sprinkle over all one cupful of buttered bread crumbs and bake twenty minutes in a moderate oven. Serve from the baking dish.

MARMALADE PIE
Mix one cupful of orange marmalade with three level tablespoons of cornstarch, two tablespoons of melted butter, two tablespoons of lemon juice, and two eggs. Beat the eggs well, whites of two eggs and pour into a pastry lined pie tin. Place in a hot oven for five minutes, reduce the heat and bake until firm.

PUREE OF EGG PLANT

Peel four medium sized egg plants and cut them into one-half inch cubes and let stand one hour; drain well, place in a saucepan and cover slowly until tender. Rub the pulp through a sieve into a clean saucers, reheat and add one-half cupful of butter to a cream with one tablespoonful of flour, stir and cook five minutes and add two-thirds of a cupful of boiling cream and a seasoning of salt and pepper. Serve with croutons.

PIG PUDDING

Mix one-third of a pound of finely chopped suet with one-half pound of finely chopped dried beans, one cupful of sifted flour with two tablespoons of baking powder, and a quart of milk. Add one cupful of cold water and add one cupful of sifted sugar, two well beaten eggs, two-thirds of a cupful of orange extract, and one egg and one cupful of melted butter. Mold to fill half full, cover tight and steam for two hours. Unmold on a hot dish and pour over a lemon sauce.

LEMON SAUCE

Mix two-thirds of a cupful of sugar with four tablespoons of sifted flour and one-quarter of a teaspoonful of salt, place in a saucepan, stir in one and one-quarter cupfuls of water, place over the fire and stir and cook until smooth. Remove from the fire and beat in three tablespoons of lemon juice and one teaspoonful of butter. Beat two minutes and serve.

SOCIETY

BY JUANA NEAL LEVY

Among the charming visitors to Southern California who have been much regretted by her many friends is Mrs. Charles William Kemmer, Jr., who with her two daughters, Dorothy, is in residence for her home in Staten Island today. Mrs. Kemmer, formerly Miss Marguerite Drake, daughter of Col. and Mrs. Charles Rivers Drake, of the Virgin Islands, has been here for the last six months. Her stay was extended owing to a severe accident at the Gillis Ranch, where the horse she was riding fell upon her and she was seriously injured. She has completely recovered, however, and as far as her strength allowed, has been much entertained by her many friends.

Mr. Kemmer came west to accompany her home, but the accident made the starting trip east problematical and he returned home some weeks ago.

Invitations Issued

Invitations are being issued by Mr. and Mrs. J. Judson Claudius of 1130 Westchester Place for a dinner Saturday evening, 27th inst., in honor of Mr. and Mrs. Richard Hageman and the leading members of the Los Angeles Grand Opera Association.

Planned in honor of the famous conductor of the opera and his charming wife, who are making a tour of the country, the dinner will be given in the home of the latter during their sojourn here at the Blimpers.

For Visitors

Honoring a number of visitors from Texas, Mrs. William D. Syers entertained on a tea Wednesday afternoon at her home in Laughlin Park, the honor guest being Miss A. J. Woodward, Mrs. Bert and Mrs. Charlie Thorne of San Antonio, and Mrs. Clara Sparger of Dallas. These visiting Texans met many former neighbors who are now residing in Los Angeles, friends of the hostess. The color scheme of pink and blue was substituted in the tea table decorations as well as in the ice and cake.

Widows chemically acquainted affairs have been arranged in honor of these popular visitors, who have many friends here.

For Bride-Elect

Mrs. Clarence Montgomery Knox entertained Tuesday afternoon with a luncheon and after-dinner cup and saucer shower at her home in the Hollywood Hills.

Mrs. Barbara Shepler Bledsoe, attractive young daughter of Judge and Mrs. Benjamin F. Bledsoe, whose wedding with Glenn Eugene Kerr will be one of the highlights of the early fall. Pastel shades, which will be used at the wedding ceremony, were carried out in all the appointments, including place cards, mint julep, ice cream, individual wedding cake made in the form of hearts with arrows piercing them, formed the motif of the decorations. Those included were Miss Mary Katherine Kirker, Miss Mildred Shearer, Miss Mildred Moir, Miss June Anable, Miss Anita Kerr, Miss Carol Botsford, Mrs. Britton, Mrs. Samuel, Mrs. Hall, Mrs. Hazel H. Culver, Mrs. Henry Stearn, Mrs. Charles Lindblade, Mrs. Earl Eastham, Mrs. Mr. and Mrs. Knox are leaving October 6, to visit the city of Los Angeles for the Hawaiian Islands.

Gone East

Mrs. W. H. Kenyon, formerly Mrs. George Caldwell Smart of this city, left for her new home in Cleveland, O., last Saturday accompanied by her attractive daughter.

to see if the condition is due to some general trouble.

Tomorrow: Mumps.

SOME NAIL TROUBLES

INGROWING TOENAILS
Ingrowing toenails most frequently arise from pressure from too narrow or otherwise ill-fitting shoes. The nail shoves itself into the soft part of the toe and naturally this part overlaps. Sometimes, apparently, without any excess pressure, the nail will take on to itself the freakish idea of growing laterally as well as lengthwise, and so shoves itself into the sides of the toe. This is infrequent, however, and we will have to acknowledge that toenails are more often shoved against than shoving.

The big toenail is the one most frequently sinner or culprit, as the case may be. The fingernails may also suffer ingrowing.

This ingrowing causes an inflammation which usually goes on to suppuration, for the reason that there are always pus germs on the skin and the condition are made right for them to develop, they certainly take advantage of it.

Treatment: For severe cases of continuously relapsing cases of ingrown toenails, the treatment is a surgical one. The nail is cut off at the edge of the toe nail that is offending. This will separate the parts, kill off the intruders and healing can go on.

Some believe that scraping the nail with a sharp knife will make it very thin, and cutting a wedge-shaped piece out of the middle of the free edge of the nail will relieve the pressure. Cutting the toenail too short instead of round is thought to promote the formation of ingrowing to nails. Of course, the prevention really consists in wearing well-fitting shoes.

Ingrowing nails on the fingers should be treated similarly. Use a rubber cot or bandage had best be worn until healing takes place.

Infammations Around the Nails

Infammations around the root and sides of a nail are caused by many different factors—Injuries, pus infections and certain diseases, for more about this condition and the use of some antiseptic medication are all that is necessary to make mere heal. Occasionally the condition is so bad that the nail will have to be removed for drainage, but that is not usual. Gloves should be worn for dish washing and other household work.

Treatment: Soak the hands in warm water. Use a poultice (home-borne) containing a teaspoonful of boraxonate of soda to the quart of water, and then sprinkle some boracic acid powder on the nails. Sometimes painting with tincture of iodine once a day is effective. If they are very bad, keep them bandaged.

A physician should be consulted.

"Times" Editorial on "Town Forests" Campaign Gets Results

Headquarters of American Tree Association at Washington was inundated by requests for the association's new booklet "Town Forests," as a result of an editorial on the subject in The Sunday Times. Photo shows office force attempting to fill orders. (P. & A. photo.)

Pearl Clad Bodies of Mound Dweller Royalty have been recently unearthed by Seip group of mounds near Bainbridge, O., by scientists who hope for important discoveries in further excavation. Photo shows workers digging mound. (P. & A. photo.)

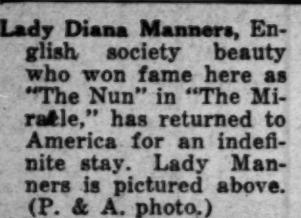

Thrilling Tales of Real Ghosts were recounted to the international meeting of spiritualists at London recently by the Duchess of Hamilton (above), one of the most fervent members of the order. Sir Conan Doyle also told his ghost experiences. (P. & A. photo.)

The Longest Golf Drive on Record was accomplished recently when Waldo Chamberlain, University of Washington golfer, drove a ball from the highest point of Pinnacle Peak, Rainier National Park. Photo shows golfer driving for 650 yards. (Kadel & Herbert photo.)

Tabulating the Last Minute Returns from the recent election which saw over Mayor Hyland as Democratic nominee for Mayor of New York. James J. Walker and Mrs. Walker are pictured above in their home. The election was a smashing defeat for the present regime. (P. & A. photo.)

Lady Diana Manners, English society beauty who won fame here as "The Nun" in "The Miracle," has returned to America for an indefinite stay. Lady Manners is pictured above. (P. & A. photo.)

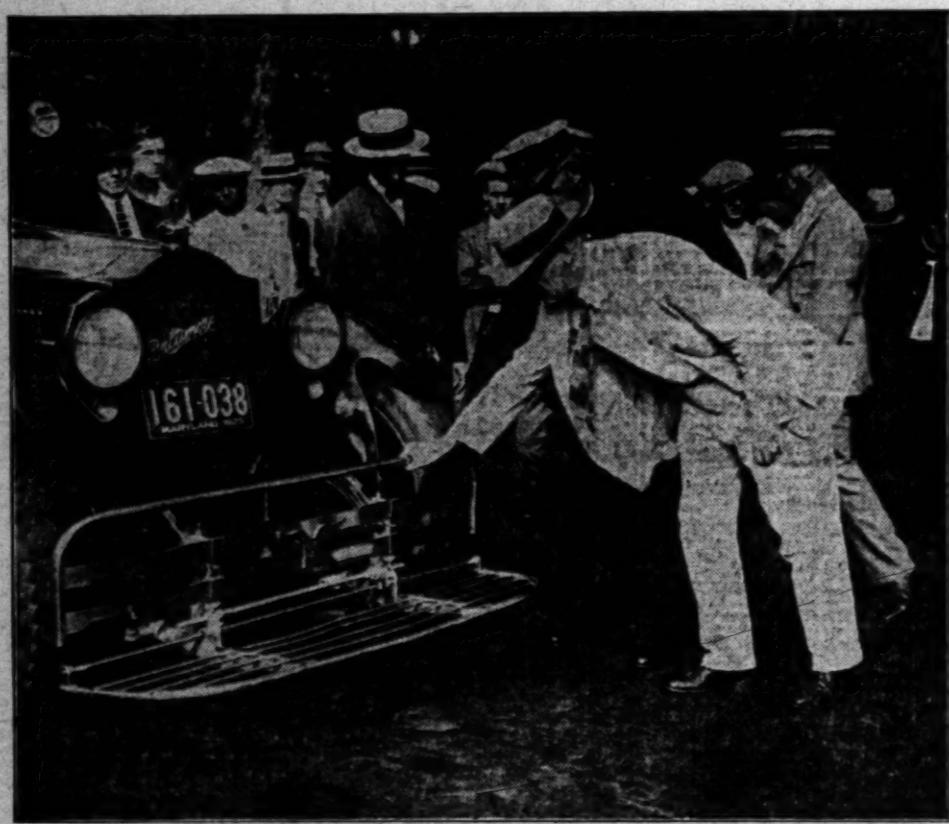

India's Sports-Loving Potentate, the Maharajah of Jodhpur (third from left) is shown above about to start on a tour of inspection of Glenclelland coal mine in England, during his recent trip there with the India polo team, of which he is patron. (Kadel & Herbert photo.)

Arrest on Drunkenness Charge of U.S. Senator Robert N. Stanfield of Oregon, at Baker, Oregon, recently, has been characterized by the Senator and his political colleagues as a "frame-up." The Senator forfeited his bond in a Baker court. (P. & A. photo.)

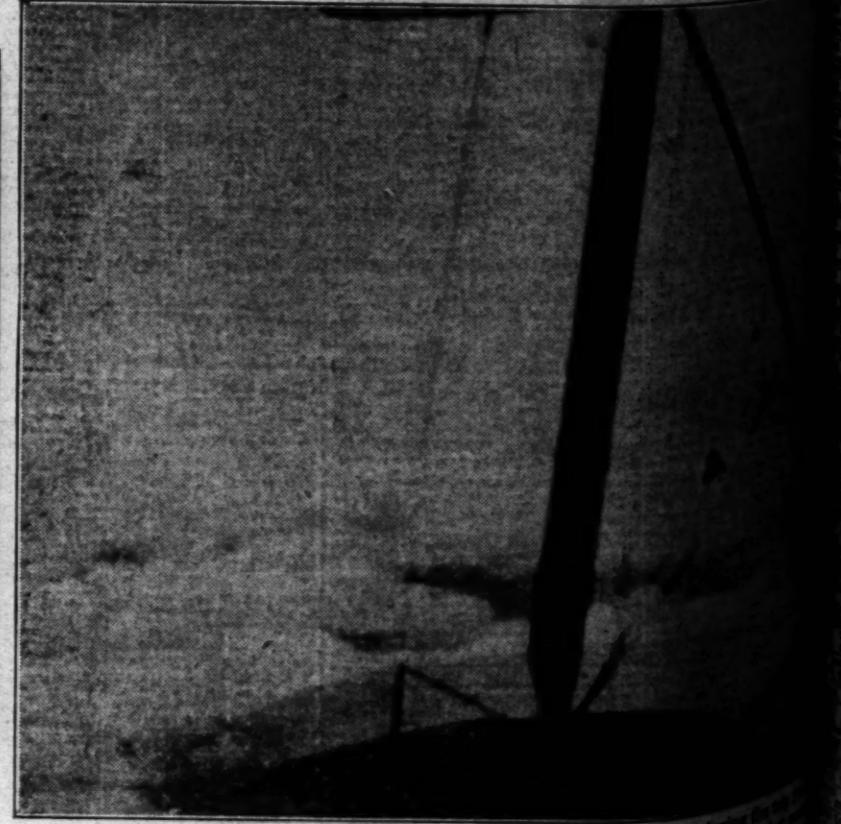

Back From a European Trip, Miss May Pershing, Warren Pershing, sister and son of Gen. John J. Pershing, are pictured above as they landed in New York recently. Warren entered a New York army and Miss Pershing returned to Lincoln, (P. & A. photo.)

Successful Safety Device for Autos was recently demonstrated at Washington, D.C. The device, consisting of a fender which picks up the body of a pedestrian, is shown above during its demonstration before police officials of the capital. (P. & A. photo.)

Two Prominent Angelenos Abroad, Alden W. Skinner (left) and K. G. Kerchoff (right) are caught by the camera during their stay in Lucerne, Switzerland. Mr. Skinner will return to Los Angeles via New York late in December.

Forced to Climb to Ceiling of World by a blinding rain storm during their trip from San Francisco to The Times Building with the PN-9 No. 1 photographing the Aviator Schoenherr and a P. & A. photographer found themselves in a cloudbank pictured above. (P. & A. photo.)
